I bought a CAA MCK from a dealer at the gun show and when I got home it didn't fit. It was my fault I told him the wrong model. Instead of waiting for the next gun show in 2 months. The owner of Engineered by POW told me that CAA was able to produce his batch of order early for pickup on a Wednesday. He trusted me and sent the correct model next day air before I had the chance to mail out the one I bought first. That was freaking awesome!!! Thank you both ... I tell all my buddies about y'all

Outstanding company lead by a great person. They genuinely care about the customer experience from beginning to end. With only a few hours in a day they've manage to keep my buying experience above and beyond exceptional. Truly a company that stands behind their product with a pleasant staff. This is not just a recommendation it's a confession you won't regret buying from CAA.

Before purchasing I did my due diligence in researching beforehand. The finish and quality of the product is unsurpassed. The fitment of my firearm in the MCK is perfect having very close tolerance when inserted. The device has maintained zero after numerous trips to the range always removing my firearm after each use.

I had a horrible experience with another company that was selling the MCK at a fantastic price. They took my money and said the product shipped even though it never did. When I inquired about it, they informed me it was out of stock and would ship when it came back in. This was over a month and a half ago. I commented on CAA's IG post about how I was waiting for the MCK. CAA took it upon themselves to private message me and let me know that it's not an actual MCK and they(the competition) were in violation of SB tactical patent on the stabilizer brace. They not only offered this information but also HONORED the price I paid from the competitor! FANTASTIC business, they will definitely be getting my money again! Thank you for everything!

While on deployments few of us had the pleasure of putting these mck's to use best part there ultra concealable light weight can fit into a normal size back pack satchel or briefcase & no one would be the wiser nor suspicious there extremely efficient when kitted with the right tools for the mission a head It truly embodies what it means to work smarter not harder. With that said I'd like to thank the men & women of the research & development team for there contributions to process of building this piece of equipment is much appreciated. Thank you

The customer service is PHENOMENAL! Everyone I have spoken with was incredibly friendly and very professional. I had a glitch with a credit card order, on an item that was time sensitive during a sale event. A lot of places I've dealt with would have simply canceled the order. Dave took the time called me, a second time in two days, as I missed his call on Wednesday. He walked me through what happened. figured out the problem and took care of the billing issue. Product shipped the same day! I got far more customer service than I thought my simple order warranted. CAA didn't see it that way, and went above and beyond. Grateful to deal with a company like this. Looking forward to my future deadlines with them. Big thanks to Dave, and every other person I dealt with! - J. Starnes

I ordered a Roni conversion kit for my Glock, and while it fit, there was an unsightly seam down the middle. Even though I was deployed for weeks, their customer service team, especially Heidi, remembered my issue and allowed me to exchange it for a newer model. I'm really impressed by their attention to detail and obliging nature. Thanks, CAA!

Preordered the MCK for the G20. Hell, I bought the 10mm specifically because I found out the MCK was coming out. The closest thing I have to a gripe is that I ordered an OD green one and got an FDE. Seriously NOT a problem. Topped it with a Razor AMG and hit the range.

Awesome! Zeroed easily at 40 yards or so. Easily repeatable accuracy after taking the pistol out and putting it back in. Seriously impressive little unit. Now I need to get another for my M&P 9.

CAA's customer service is truly outstanding, they answered every question I had and quickly. I had pre ordered the Micro Roni stabilizer with brace, and they made it very easy and hassle free, I will leave a review of the micro Roni when I get it but just had to leave a review of their customer service because they truly were that helpful

I loved it, excuse me I still love it, the things that Mikey Hartman in the rest of the guys down there at CAA are doing they're doing it for us, the added range the comfort durability you cannot beat this conversion kit, to me if you're Glock fan this is must-buy, no Glock is complete without a micro Roni
